<p>Tri-active Retinol This triple retinol formation uses next – generation retinoid active technologies. It improves skin structure by stimulating the production of collagen and elastin. This treatment will improve the appearance of fine lines and wrinkles, reduce acne and pore congestion, and effectively treat hyperpigmentation. The active ingredients of the formulation are released into the skin non-simultaneously, the continuous and prolonged release ensures pre- and prolonged anti – aging results</p>	R1060

DERMEXCEL PEEL ADD ONS

<p>Collagen Serum A powerful antioxidant serum that will brighten the skin tone and reduce signs of aging. Tetrahexyldecyl Ascorbate is one of the most stable and potent forms of Vitamin C. It has the ability to increase collagen levels, reduce melanin production, brighten skin, and repair the effects of UV exposure and other environmental damage. Collagen serum will visibly plump skin, enhance skin tone, reduce pore size and smooth lines and wrinkles.</p>	R50
<p>Retinol Serum This advanced formula has a phenomenally restorative influence on the many layers of the skin. It improves the appearance of the toughest skin concerns: wrinkles, uneven skin tone, loss of firmness, blemishes, and enlarged pores. The inclusion of Abyssine will reduce irritation, reactivity & intolerance in sensitive skin.</p>	R50

VelaShape III is a non-invasive body contouring treatment for circumferential and cellulite reduction. VelaShape enables you to safely achieve a toned, contoured and well shaped body in typically 3 – 6 treatment sessions making you look and feel more youthful. VelaShape provides dramatic results without downtime or significant discomfort.

VelaShape technology combines infrared light, bi-polar radio frequency energy and vacuum, which cause deep heating of the fat cells, their surrounding connective tissue and the underlying dermal collagen fibers.

This type of efficient heating and vacuum stimulates the growth of new and better collagen and elastin which results in localised reduction in skin laxity, body volume, and an overall improvement in skin structure and texture.

Which areas can be treated with VelaShape?

Cellulite treatments could be done on the lower body i.e buttocks and upper legs. Contouring treatments can be done on the neck, double chin, upper arms, abdomen, love handles, saddle bags and bra fat.
