R1100

MASK

R250

What is Nanoneedling?

Nanoneedling is a non-invasive transdermal delivery system. An extremely effective yet, non-invasive or painless procedure that targets a large range of skin conditions with NO DOWNTIME!

Unlike microneedling that uses actual needles to create micro-injuries, nano-needling uses a tip with 108 silicon hair-like cones that separate the cells of the top layer of the skin, to allow enhanced penetration of active products.

pHixel RESURFACING

What is pHixel Resurfacing?

It's the application of AA solution whilst nanoneedling is performed.

AA Solution contains 4 key ingredients :

- L-Arginine - A powerful anti-oxidant.
- Mandelic acid - Treats pigmentation.
- Phytic acid - Reduces the appearance of fine lines and wrinkles.
- Pyruvic acid - Stimulates collagen and elastin.

The AA solution combined with nanoneedling ensures gentle resurfacing with maximum proton release to enhance penetration of the actives. Giving your skin an advanced radiance and rejuvenation boost.

SILVER pHixel resurfacing treatment

Consist: Nanoneedling with AA solution.

R760

GOLD pHixel resurfacing treatment

Consist: Nanoneedling with AA solution with **ONE** add on. (Dermabrasion or S.O.S repair mask)

R950

PLATINUM pHixel resurfacing treatment

Consist: Nanoneedling with AA solution with **TWO** add ons. (Dermabrasion & S.O.S repair mask)

Indicated for Aging; Photodamaged and Pigmentation skin types.

R745

Illuminize

Helps provide vibrant, radiant looking skin with minimal downtime.

Indicated for Aging; Photodamaged; Pigmentation & Congested Pore skin types.

R745

Dermalize

Dermalize peel dramatically diminishes the appearance of discoloration, while smoothing texture and refining the appearance of pores to restore a brighter, more clarified skin tone. This peel has no downtime and is a perfect treatment the day before any big event for improved color, clarity, and texture.

R745

Tri-active Retinol

This triple retinol formation uses next – generation retinoid active technologies.

It improves skin structure by stimulating the production of collagen and elastin.

This treatment will improve the appearance of fine lines and wrinkles, reduce acne and pore congestion, and effectively treat hyperpigmentation.

The active ingredients are released into the skin non-simultaneously, the continuous and prolonged release ensures pretent and prolonged anti – aging results.

R1060

PEEL ADD ONS

Collagen Serum

A powerful antioxidant serum that will brighten the skin tone and reduce signs of aging.

Tetrahexyldecyl Ascorbate is one of the most stable and potent forms of Vitamin C.

It has the ability to increase collagen levels, reduce melanin production, brighten skin, and repair the effects of UV exposure and other environmental damage. Collagen serum will visibly plump skin, enhance skin tone, reduce pore size and smooth lines and wrinkles.

R50

Retinol Serum

This advanced formula has a phenomenally restorative influence on the many layers of the skin.

It improves the appearance of the toughest skin concerns: wrinkles, uneven skin tone, loss of firmness, blemishes, and enlarged pores.

The inclusion of Abysine will reduce irritation, reactivity & intolerance in sensitive skin.

R50

MICRONEEDLING

Microscopic puncture channels are lightly stamped in the skin. Stimulating an inflammatory or wound healing response. This promotes intense renewal, repair and rejuvenation. Natural growth factors are released to stimulate reformation and deposition of fresh restructuring collagen and fibroblasts.

LASER HAIR REMOVAL

VelaShape III is a non-invasive body contouring treatment for cellulite and circumferential reduction. Enabling you to safely achieve a toned, contoured and well shaped body in typically 3 – 6 sessions.

VelaShape technology combines infrared light, bi-polar radio frequency energy & vacuum, which cause deep heating of the fat cells, their surrounding connective tissue and the underlying dermal collagen fibers. This type of efficient heating and vacuum stimulates the growth of new and better collagen and elastin which results in localised reduction in skin laxity, body volume, and overall improvement in skin structure & texture.

AREAS THAT CAN BE TREATED?

Cellulite: the lower body i.e buttocks and thighs

Contouring: neck, double chin, upper arms, abdomen, love handles, saddle bags & bra fat.
